SUMMARY

A passionate and self-motivated **Mern Stack Developer**. My journey in this field is fueled by a passion for creating engaging and visually appealing web websites that captivate users. In past 1 year , I have gained skills like **MERN Stack, Problem Solving using programming, DSA**. Through dedication, practice, and perseverance, I aspire to evolve into a skilled software developer, contributing to meaningful projects.

EDUCATION

Bachelor of Technology - CSE (Software Product Engineering)

MIT Art, Design and Technology University · Pune, Maharashtra · 2027 · 8.64

SKILLS

Languages: Python, C++, JavaScript, Data Structures & Algorithms

MERN Stack : React , NodeJs , Express , MongoDb, Tailwind CSS, Bootstrap

Data/Tools: MongoDB, MySQL, Git, Postman, Bruno, Figma

PROJECTS

DoPahiya - Bike Spec Store

dopahiya.netlify.app/ · May 2024 -June 2024
· **Comprehensive Bike Specification Store**: Offers detailed information and personalized recommendations for various bike models. Hosts data for around 110 bikes.
· **Robust Authentication**: Features secure authentication, including third-party options.
· Full CRUD Support: Enables **Create, Read, Update, and Delete operations** for managing bike data.
· Performance Optimization: Utilizes the **Context API** to optimize performance.
· **Mobile-Responsive Design**: Provides a seamless and engaging experience for bike enthusiasts on all devices.
· Tech Stack: React, Node.js, Express, MongoDB, JWT, REST APIs, Bruno.

Chat.io - RealTime Chat Application

chatioo.netlify.app/ · May 2024 -June 2024
· Chat.io offers an innovative messaging platform designed with a focus on robust functionality to facilitate seamless communication.
· Utilizing **socket.io**, it enables users to chat in **rooms** with multiple participants in real time.
· Tech Stack: React, Nodejs, Express, Socket.io.

Student Management System

github.com/Ayush9535/Student-Data-Management-System · March 2023 - April 2023
· Student Management System, a **python project** where you can manage student's data.
· You can perform all **Create , Read , Update , Delete** operations on the data. Data being stored in **Sql Database.**
· Tech Stack: Python , Mysql Database.

Ladder Legacy - Replica of Snakes and ladders

ladder-legacy.netlify.app/ · November 2023 - December 2023
· **Frontend Project**: Replica of the traditional snakes and ladders game.
· **Mobile-Responsive**: Ensures a seamless experience on all devices.
· **Complex Game Logic**: Incorporates intricate rules and mechanics of the game.
· **Interactive User Interface**: Engages users with a dynamic and interactive design.
· Tech Stack: HTML, CSS, JavaScript, Figma.

Squad 56 Portfolio

squad56.netlify.app/ · January 2024 - January 2024
· Developed and deployed a responsive portfolio website built by me and my peers, as a group project.
· This project shows information of my squad members and projects built by us.
· Tech Stack : Html, Css, Javascript.
